

## Masaki Toriumi

Alliance Global Director,  
EV and HEV Engineering Division  
Nissan Motor Co., Ltd.

Masaki Toriumi started his career at Nissan in 1992. He was promoted to a Manager in 2006 and has been in charge of powertrain planning until he was transferred to Renault in 2008. At Renault, he served as a Project Manager for diesel project, and also as Deputy General Manager for product strategy department in Product Planning Division. In 2014 he was transferred to Nissan Technical Center Europe Spain as a Vice President for powertrain development, Vehicle test and LCV engineering until he takes the current position in 2017.

He is currently the Alliance Global Director, responsible for EV and HEV Engineering. These are one of the main pillars of Nissan Intelligent Mobility, which is Nissan's strategy to use advancements in autonomous drive, electrification and connected car technologies to deliver great products for our customers and move people to a better world.

Toriumi graduated from University of Tokyo, Master Degree of Aeronautical Engineering.
